

RADIOCARBON Featured Publications

Radiocarbon 50th Anniversary

Radiocarbon Vol 51, Nr 1, 2009; \$25.00 (\$40.00)

This special 50th Anniversary issue includes papers covering the many applications of radiocarbon dating, from the early years to the latest in research. Papers are organized into three themes: 1) Applications, Developments & Historical Perspectives; 2) Archaeology; and 3) Calibration. Many distinguished authors contributed to the issue, including Ingrid Olsson and Wally Broecker, both of whom published in the first ever *Radiocarbon* issue 50 years ago! 384 p.

Proceedings of the 19th International Radiocarbon Conference

Radiocarbon Vol 49, Nr 2, 2007 \$20.00

Proceedings of the 2006 International ^{14}C Conference held in Oxford, UK. Includes subject and author indexes and a list of participants. Guest Editors: Christopher Bronk Ramsey and Thomas F G Higham.

IntCal09

Guest editor Paula J. Reimer

Radiocarbon Vol 51, Nr 4, 2009; \$30.00

This 2009 calibration volume is the fifth of a series published in *Radiocarbon*, amending and extending the previous issues. For IntCal09, the contributors used paired data sets of tree rings dated by ^{14}C and by dendrochronological counting, varved marine sediments, and corals dated by ^{14}C and uranium-series. As a result, considerably more measurements have become available in the past few years, enabling the radiocarbon time scale to be extended to 50,000 calibrated years BP. 305 p
